DAIKIN

Shaping air to your needs

VRV III-S

THE INTELLIGENT AIR CONDITIONING SYSTEM

A special air conditioning system designed for small-sized buildings

HEAT PUMP

Heat Pump 50 Hz

R-410A

The ideal air conditioning small office

Extending the core "5S" concept—Space saving, Sufficient capacity, Slim design, Sound-reduced operation and Single phase power supply—Daikin's VRVIII-S offers added value with the "1E" concept—Easy installation. With all these features and more, we proudly present the ideal air conditioning system designed for small-sized buildings.

VRVIII
(5 class (14 kW))

VRVIII-S
(4, 5, 6 class (11.2, 14, 15.5 kW))

Outdoor unit can be installed on a balcony

The compact, trunk-shaped outdoor unit can easily be installed on a balcony, realising complete system installation within each floor. This enables more useful utilisation of the space on the building rooftop.

Contents

Wide range of choices

To suit the variety of rooms found in small offices and shops, the VRVIII-S system offers a wide range of indoor and outdoor units.

VRVIII-S indoor and outdoor units are almost as easy to install as residential air conditioning systems, making them ideal for small offices and shops.

Outdoor units
3 models

Outdoor unit can be selected from three models to provide the power that suits your needs. The trunk-shaped outdoor unit can be neatly installed outside the office.

Outdoor unit lineup

Note: BEV units are necessary for Connection unit series indoor units. Refer to the Engineering Data Book for details.

Energy efficiency and quiet operation

Outdoor units use Daikin's unique scroll compressor for energy efficiency and quiet operation.

High COP during both cooling and heating operations

One of the top features of the VRVIII-S is its energy efficiency. It achieves high COP during cooling and heating operations by utilising Daikin's unique scroll compressor.

High COP achieved in all ranges!

		VRVII-S Previous model RXYMQ-MV4A		VRV III-S
Cooling	4 class (11.2 kW)	3.07	→	**3.15**
	5 class (14 kW)	2.81	→	**2.94**
	6 class (15.5 kW)	2.82	→	**3.03**
Heating	4 class (11.2 kW)	3.27	→	**3.37**
	5 class (14 kW)	3.58	→	**3.73**
	6 class (15.5 kW)	3.45	→	**3.62**

Above values are based on the following nominal conditions:
• 2 built-in units are connected (4 class (11.2 kW): FXSYQ50M x 2; 5 class (14 kW): FXSYQ63M x 2; and 6 class (15.5 kW): FXSYQ63M + FXSYQ80M.)
• Cooling: Indoor temp. of 27°CDB, 19.0°CWB, and outdoor temp. of 35.0°CDB.
• Heating: Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.

Quiet operation provides luxurious comfort

Quietness is yet another important feature of Daikin's VRVIII-S system. To reduce noise and realise comfortable operation, latest technologies and features are applied to the outdoor units.

Lower operation sound is achieved!

1 dB(A) reduced in each model!

		VRVII-S Previous model RXYMQ-MV4A		VRV III-S
Cooling	4 class (11.2 kW)	51	-1dB(A)	**50**
	5 class (14 kW)	52	-1dB(A)	**51**
	6 class (15.5 kW)	54	-1dB(A)	**53**
Heating	4 class (11.2 kW)	53	-1dB(A)	**52**
	5 class (14 kW)	54	-1dB(A)	**53**
	6 class (15.5 kW)	56	-1dB(A)	**55**

Nighttime quiet operation function

Operation sound level selectable from 3 steps for the night mode

Mode 1. Automatic mode

Set on the outdoor PCB. Time of maximum temperature is memorised. The low operating mode will initiate 8 hours[1] after the peak temperature in the daytime, and normal operation will resume 10 hours[2] after that. The operation sound level for the night mode can be selected from 47 dB(A) (Step 1), 44 dB(A) (Step 2) and 41 dB(A) (Step 3).

Mode 2. Manual mode

Starting time and ending time can be input. (An external control adaptor for outdoor unit, DTA104A53/61/62, and a locally obtained timer are necessary.)

Mode 3. Combined mode

Combinations of modes 1 and 2 can be used depending on your needs.

*1. Initial setting. Can be selected from 6, 8 and 10 hours.
*2. Initial setting. Can be selected from 8, 9 and 10 hours.

Mode 1. Automatic mode

Peak in outdoor temperature

8 hrs (Initial setting)
10 hrs (Initial setting)

Night Mode

Step 1 max. - 3 dB(A) (4 class/11.2 kW) — Step 1: 47 dB(A)
Step 2 max. - 6 dB(A) (4 class/11.2 kW) — Step 2: 44 dB(A)
Step 3 max. - 9 dB(A) (4 class/11.2 kW) — Step 3: 41 dB(A)

Night mode **starts** — Night mode **ends**

8:00 12:00 16:00 20:00 0:00 4:00 8:00
Note: • This function is available in setting at site.
• The relationship of outdoor temperature (load) and time shown in the graph is just an example.
★ The capacity reduction rate differs depending on the operation sound level step selected.

A collection of cutting-edge technologies results in efficient and quiet operation.

The high efficiency compressor to achieve a higher COP

1 Compressor equipped with Reluctance DC motor

Daikin DC inverter models are equipped with the Reluctance DC motor for compressor. The Reluctance DC motor uses 2 different types of torque, neodymium magnet[1] and reluctance torque[2]. This motor can reduce energy used because it generates more power with a smaller electric power than an AC or conventional DC motor.
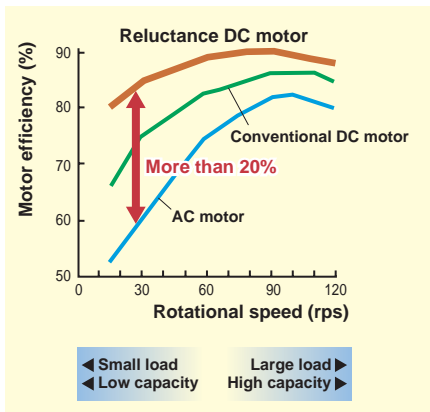

RXYMQ4PV4A
RXYMQ5PV4A
RXYMQ6PV4A

Reluctance DC motor

Note: Data are based on studies conducted under controlled conditions at a Daikin laboratory using Daikin products.

[1] A neodymium magnet is approximately 10 times stronger than a standard ferrite magnet.
[2] The torque created by the change in power between the iron and magnet parts.
>> Smooth sine wave DC inverter

Use of an optimised sine wave smoothes motor rotation, further improving operating efficiency.

Sine wave DC inverter
2 Smooth Air Inlet Bell Mouth and Aero Spiral Fan

These two features work to reduce sound. Guides are added to the bell mouth intake to reduce turbulence in the airflow generated by fan suction. The Aero Spiral Fan features fan blades with the bent blade edges, further reducing turbulence.

With the bent blade edge
Without the bent blade edge

Escaping eddies are sucked in by the bent blade edges, reducing overall turbulence.

3 DC fan motor

Efficiency improved in all areas compared to conventional AC motors, especially at low speeds.

DC fan motor structure
DC motor efficiency (comparison with AC motor)

Note: Data are based on studies conducted under controlled conditions at a Daikin laboratory.

6

Design flexibility

VRVIII-S systems offer broad design flexibility with long refrigerant piping lengths and multiple indoor unit combinations, which provides generous freedom for office and shop design both inside and out.

Up to 9 indoor units can be connected to a single outdoor unit

Multiple indoor unit combinations are possible.* As many as 9 indoor units can be connected to a 6 class (15.5 kW) unit, making the VRVIII-S a versatile system.

* Total capacity index of connectable indoor units must be 50 - 130 % of the capacity index of the outdoor unit.

For a **6 class (15.5 kW)** installation

Max. 9 units

>> **Max. 8 indoor units** for a **5 class (14 kW)** installation

>> **Max. 6 indoor units** for a **4 class (11.2 kW)** installation
Long piping design possible

The VRVIII-S provides the long piping length possibility of 150 m, with a total piping length of 300 m. If the outdoor unit is installed above indoor units the level difference can be up to a maximum of 50 m. These generous allowances facilitate an extensive variety of system designs.
Actual piping length Max. 150 m

Total piping length Max. 300 m

*2

Max. 50 m*1 Level difference

Max. 15 m Level difference between indoor units

Note: *1. 40 m when the outdoor unit is installed below indoor units.
*2. Maximum piping length between the indoor unit and the first branch is 40 m.

Wide operation temperature range

The operation range of the VRVIII-S system works to reduce limitations on installation locations. The operation temperature range for heating goes all the way down to -20°C, while cooling can be performed with outdoor temperatures as high as 46°C. Both these achievements are due to the adoption of a high-pressure dome-type compressor.

Certified operation temperature range

Heating
Easy installation

A variety of functions are provided that make installation easier, such as simple wiring and piping and automatic test operation.

Easy wiring

A printed circuit board has been adopted that is much easier to see and wire during installation.

VRV III-S

Previous model
VRVII-S
Automatic test operation

Simply press the test operation button after refrigerant charging is completed, and the unit performs an automatic system check, including wiring, shutoff valves, and sensors. The results are returned automatically after the check finishes.

Simple wiring and piping connection

Unique piping and wiring systems make it possible to install a VRVIII-S system quickly and easily.

>> Super wiring system

A super wiring system is used to enable shared use of the wiring between indoor and outdoor units and the central control wiring, with a relatively simple wiring operation. The DIII-NET communication system is employed to enable the use of advanced control systems.

Outdoor unit

Central remote controller

Indoor unit
>> REFNET piping system

Daikin's advanced REFNET piping system makes installation easy. Only two main refrigerant lines are required in any one system. REFNET greatly reduces the imbalances in refrigerant flow between units, while using small-diameter piping.
Control systems

The VRVIII-S system uses the same DIII-NET communication system as the VRV, enabling the use of advanced control systems.

Individual control systems

Wired remote controller (Option)

BRC1C62

- Digital display lets you set temperature in 1°C units.
- Lets you individually programme by timer the respective times for operation start and stop within a maximum of 72 hours.
- Equipped with a thermostat sensor in the remote controller that makes possible more comfortable room temperature control.
- Enables you to select cool/heat/fan operation mode with the indoor remote controller of your choice without using the cool/heat selector. (dependant on system)
- Equipped with self-diagnosis function that constantly monitors the system for malfunctions. Should a problem occur, the system alerts you of the problem through an alphanumeric code.
- The rubber switch and the oil-resisting resin casing have been adopted for durability.

* When the auto-swing function is not available, the message, THIS FUNCTION IS NOT AVAILABLE is displayed when the air direction adjustment button is pressed.

Wired remote controller with weekly schedule timer (Option)

BRC1D61

Adds advanced functions to those of the above wired remote controller.

- Includes ventilation mode and airflow rate switching, the main functions of Heat Reclaim Ventilator series.
- 24-hour clock function (1-hour backup for power failures)
- Programming function for each day of week.
- Scheduling possible of start/stop and temperature limit (5 settings/day)
- Programming can be enabled or disabled.
- Copy function for programmed schedules.

Notes: 1. Standard remote controllers (BRC1C62) not required.
2. If the BRC1D61 is connected to the centralised remote controllers (DCS303A51, DCS302CA61,DCS301BA61, DST301BA61), the schedule function is not available.

The wired remote controller supports a wide range of control functions

- **Control of Cool/Heat changeover** In all the series of VRV, Cool/Heat changeover in the same refrigerant circuit can be changed by the master remote controller of an indoor unit.

Outdoor unit

Equipment related to the central control

- **Group control** One remote controller can control the operation of max.16 indoor units at the same time.

Remote controller

Indoor unit

Remote controller

Remote controller

Heat Reclaim Ventilator

Forced OFF input

Remote controller

Remote controller

Remote controller

Remote controller

Remote controller

1   **Control by two remote controllers**

The indoor unit can be connected by the two remote controller, for example one in the room and the other one in the control room, which can control the operation of indoor unit freely. (The last command has a priority.) Of course, the group control by two remote controllers is also possible.

2   **Remote control**

The wiring of remote controller can be extended to max.500 m and it is possible to install the remote controllers for the different indoor units in one place.

3   **Control for the combined operation**

The operation of Heat Reclaim Ventilator can be controlled by the remote controller of the indoor unit. Of course, the remote controller can display the time to clean the filter.

4   **Expansion of system control**

The system can be expanded to add several controllers, such as BMS, Forced OFF input and etc.

★ Refer to page 7 for the total number of indoor units that can be connected to the outdoor unit.

Wireless remote controller (Option)

Signal receiver unit
(Separate type)

Wireless remote
controller

■The same operation modes and settings as with wired remote controllers (BRC1C62 only) are possible.

■A compact signal receiver unit (separate type) to be mounted into a wall or ceiling is included.

• A signal receiver unit (installed type) for a Ceiling Mounted Cassette (Round Flow, Compact Multi Flow, Double Flow) type, Ceiling Suspended type and Wall Mounted type is mounted into the indoor unit.

Signal receiver unit can be installed on the panel
ex. Ceiling Mounted Cassette (Round Flow) type

Signal receiver unit
(Installed type)
*Wireless remote controller and signal receiver unit are sold as a set.
* Refer to page 37 for the name of each model.

Simplified remote controller (Option)
Exposed type
(BRC2C51)

Concealed type
(For hotel use)
(BRC3A61)

■The remote controller has centralised its frequently used operation selectors and switches (on/off, operation mode, temperature setting and airflow volume), making itself suitable for use in hotel rooms or conference rooms.

■The exposed type remote controller is fitted with a thermostat sensor.

The concealed type remote controller smartly fits into a night table or console panel in a hotel room.

Centralised control systems

■ Up to 64 groups of indoor units (128 units) can be centrally controlled.

■ Optional controllers for centralised control can be combined and optimised in accordance with building scale and purpose.

■ System integration with various air-conditioning peripheral equipment such as Heat Reclaim Ventilator is easy.

■ Wiring can be run up to a total length of 2 km, and adapts easily to large-scale system expansion.

Unified on/off controller (DCS301BA61)

Connection of up to 8 units possible

Connectable number of centralised control equipment

Central remote controller	2 units
Unified on / off controller	8 units
Schedule timer	1 unit

Address setting of central control can be performed from the remote controller.

Independent and centralised control of Heat Reclaim Ventilator is possible.

Group control of up to 16 units is possible ★1 (group control via automatic address setting)

System without remote control is also available.

Forced shut-down input

Central remote controller (DCS302CA61)

Up to 2 units connectable

Interface adaptor for SkyAir series (DTA102A52 or DTA112BA51)

Central control adaptor kit (DTA107A55)

Wiring adaptor for other air-conditioners (DTA103A51)

Outdoor-air processing unit can be connected.

Schedule timer (DST301BA61)
1 unit connection possible ;
8 weekly schedule control patterns possible

6 cores

7 cores max.

Unification adaptor for computerised control (DCS302A52)

Interlink Building Management System (host computer monitor panel) also possible

★1. Refer to page 7 for the total number of indoor units that can be connected to the outdoor unit.

• Certain indoor units limit the functions of some control systems.
For more details, please refer to the Engineering Data Book.

Residential central remote controller* (Option)

Max. 16 groups of indoor units can be easily controlled with the large LCD panel.

- Max. 16 groups (128 indoor units) controllable
- Backlight and large LCD panel for easy readability
- ON/OFF, temperature settings and scheduling can be controlled individually for indoor units.
- All indoor units can be turned on or off at once with "ALL" button.
- Each group has a dedicated button for convenience.
- Outside temperature display

DCS303A51

* For residential use only. Cannot be used with other centralised control equipment.

Central remote controller (Option)

Max. 64 groups (zones) of indoor units can be controlled individually same as LCD Remote controller.

- Max. 64 groups (128 indoor units) controllable
- Max. 128 groups (128 indoor units) are controllable by using 2 central remote controllers, which can control from 2 different places.
- Zone control
- Malfunction code display
- Max. wiring length 1,000 m (Total: 2,000 m)
- Connectable with Unified ON/OFF controller, schedule timer and BMS system
- Airflow volume and direction can be controlled individually for indoor units in each group operation.
- Ventilation volume and mode can be controlled for Heat Reclaim Ventilator.
- Up to 4 ON/OFF pairs can be set per day by connecting a schedule timer.

DCS302CA61

Unified ON/OFF controller (Option)

Max. 16 groups of indoor units can be operated simultaneously/individually.

- Max. 16 groups (128 indoor units) controllable
- 2 remote controllers can be used to control from 2 different places.
- Operating status indication (Normal operation, Alarm)
- Centralised control indication
- Max. wiring length 1,000 m (Total: 2,000 m)
- Compact size casing (Thickness: 16 mm)
- Connectable with Central Remote controller, Schedule timer and BMS system

DCS301BA61

Schedule timer (Option)

Max. 128 indoor units can be operated as programmed schedule.

- Max. 128 indoor units controllable
- When used in combination with a central remote controller, a maximum of 8 weekly schedule patterns can be set, while the central controller can be used to select desired zones. Up to 2 ON/OFF pairs can be set per day.
- Max. 48 hours back up power supply
- Max. wiring length 1,000 m (Total: 2,000 m)
- Compact size casing (Thickness: 16 mm)
- Connectable with Central Remote controller, Unified ON/OFF controller and BMS system

DST301BA61

Advanced control systems

intelligent touch Manager New

One touch selection to total air comfort

Daikin proudly introduces its new *intelligent Touch Manager*, a VRV system controller featuring an array of simple, useful system management functions for added value.

Up to 2,560 groups (5,120 indoor units) can be controlled by one system

System Architecture
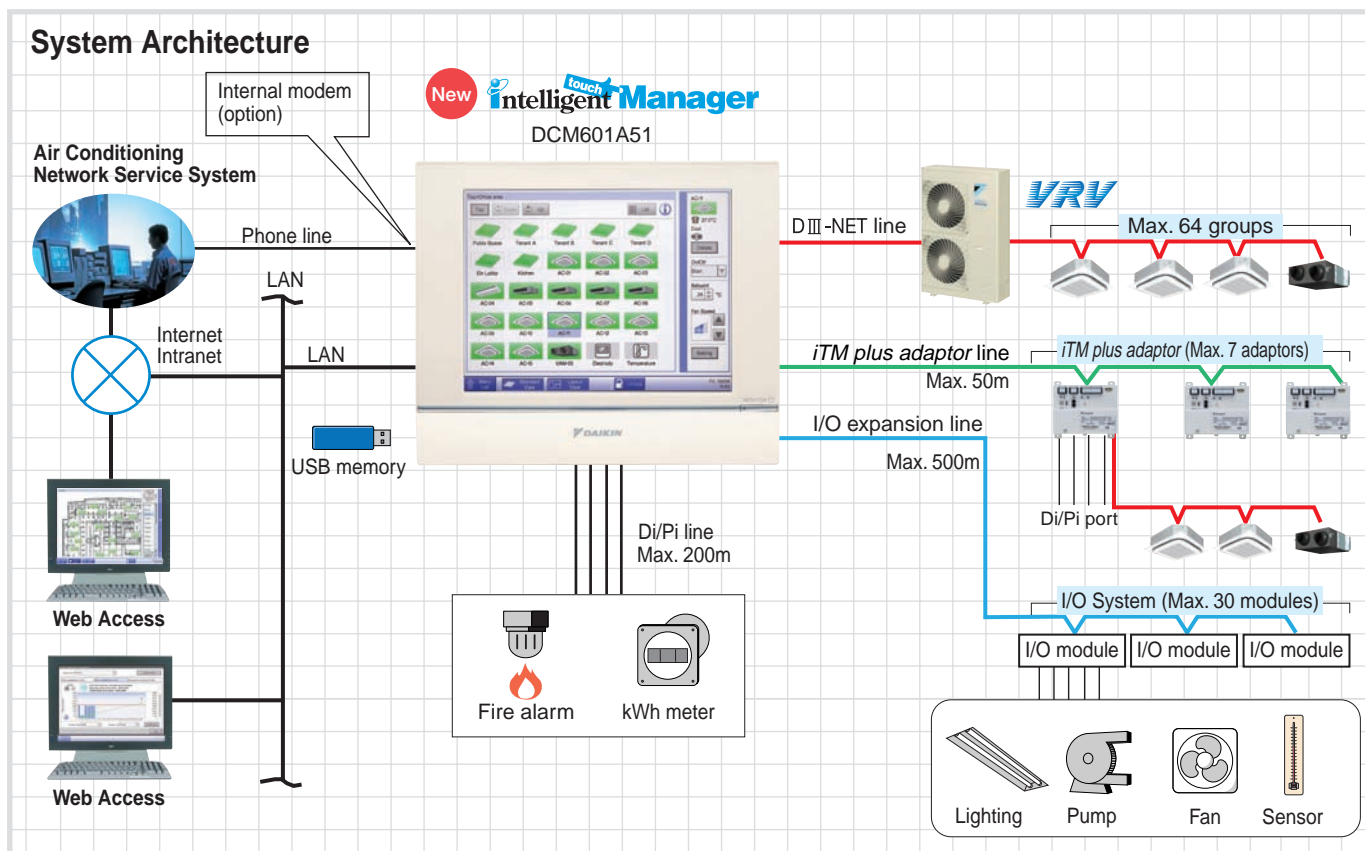

Features

■ Central control
- Handy area settings simplify detailed management of VRV.
- Display of floor plans enables a quick search of desired air conditioning units.
- Operation history shows manner of control and origin in past operations of air conditioning units.

■ Remote access
- Remote access with a PC allows total air conditioning management using the same type of screens as those displayed in the *intelligent Touch Manager*.
- Authorised users can centrally control individual air conditioning units from their own computers.

■ Automatic control
- VRVs are controlled automatically throughout the year by the schedule function.
- Interlocking VRVs and other equipment enables easy automation of building facilities operation.
- Setback adjusts temperature settings even when rooms are unoccupied.

■ Energy management
- The Energy Navigator feature simplifies energy management by tracking energy consumption data and identifying inefficient operation.

■ Troubleshooting
- Contact information of maintenance contractors can be registered and displayed.
- E-mails are sent automatically to alert of malfunctions and potential trouble.
- The *intelligent Touch Manager* can link to the Air Conditioning Network Service System for 24-hour monitoring of operating conditions and status.

■ Scalability
- A single *intelligent Touch Manager* can manage a small building or be expanded to handle medium- to large-sized buildings.
- Large building properties can also take advantage of the *iTM integrator* to link up and expand system up to 5 *intelligent Touch Managers* for integrated control.

intelligent touch Controller

Communication functions in the user-friendly icon-based multilingual controller simplify centralised control of the VRV system.

Ceiling Mounted Cassette (Round Flow) Type

FXFQ25P/FXFQ32P/FXFQ40P
FXFQ50P/FXFQ63P/FXFQ80P
FXFQ100P/FXFQ125P

ROUND FLOW

## 360° airflow improves temperature distribution and offers a comfortable living environment.

- The industry's first* Round Flow Ceiling Mounted Cassette type offers 360° airflow with improved temperature distribution.

4-way flow

Round Flow

There are areas of uneven temperature.

There are much fewer areas of uneven temperature.

* As of April 2004, the release date for Japan.

- All models are lighter than the conventional ones. Ex: Models FXFQ25P-50P are 4.5 kg lighter (reduced from 24 kg to 19.5 kg).

- Drain pump is equipped as a standard accessory, and the lift height has been improved from 750 mm to 850 mm.

850 mm
- A modern sophisticated decoration panel has been applied, with a panel surface that has been treated with a dirt-repellant coating.

Treated surface   Untreated surface

Resists soiling

Dirt and grime

• Condition after exposure to the smoke of 600 cigarettes in 1 m³ enclosed space.

- Control of the airflow rate has been improved from 2-step to 3-step control.

- Low operation sound level   (dB(A))

FXFQ-P	25/32	40	50	63	80	100	125
Sound level (HH/H/L)	30/28.5/27	31/29/27	32/29.5/27	34/31/28	36/33.5/31	43/37.5/32	44/39/34

- An antibacterial treatment that uses silver ions has been applied to the drain pan, preventing the growth of slime, mould and bacteria that cause blockages and odours.

- The horizontal louvres prevent dew condensation. Their non-flocking surfaces, which repel dirt, are easy to clean.

- The air filter has an anti-mould and antibacterial treatment that prevents the growth of mould generated from dust or moisture that may adhere to the filter.

- Example of airflow patterns:
  360° airflow is available, as well as 2- to 4-way flows, so you can choose the most suitable airflow pattern depending on location or room layout.

All-round flow   **4-way flow**   **3-way flow**   **L-shaped 2-way flow**

Note: Whatever the discharge direction, the same type of panel is used. If installing for other than all-round flow, an air discharge outlet sealing member (option) must be used to close each unused outlet.

Ceiling Mounted Cassette (Compact Multi Flow) Type

FXZQ20M/FXZQ25M
FXZQ32M/FXZQ40M
FXZQ50M

Quiet, compact, and designed for user comfort

- Dimensions correspond with 600 mm × 600 mm architectural module ceiling design specifications.

- Low operation sound level

(240 V)(dB(A))

FXZQ-M	20/25	32	40	50
Sound level (H/L)	32/26	34/28	37/29	42/35

- Comfortable airflow

❶ Wide discharge angle: 0° to 60°
- Auto swing
- Fixed angles: 5 levels
＊Angles can be also set on site to prevent drafts (0°-35°) or soiling of the ceiling (25°-60°), other than standard setting (0°-60°).

❷ 2-, 3-, and 4-way airflow patterns are available, enabling installation in the corner of a room.

4-way flow   **3-way flow**   **L-shaped 2-way flow**
＊For 3-way or 2-way flow installation, the sealing member for air discharge outlet (option) must be used to close each unused outlet.

- Drain pump is equipped as a standard accessory with 750 mm lift.

750 mm

FXCQ40M/FXCQ50M/FXCQ63M
FXCQ80M/FXCQ125M

Thin, lightweight, and easy to install in shallow ceiling spaces

- The low profile unit (only 305 mm high) can be installed in a ceiling space as shallow as 350 mm. All models feature a compact design with a depth of only 600 mm.

305 mm
(When a high-efficiency filter is attached, the unit's height is 400 mm.)

- Low operation sound level (240 V)(dB(A))

FXCQ-M	20	25/32	40/50	63	80	125
Sound level (H/L)	34/29	36/30	37/32	39/34	41/36	46/40

- Designed with higher airflow suitable for high ceiling application up to 3 metres.

- Providing 2 different settings of standard and ceiling soiling prevention, the auto swing mechanism achieves even distribution of airflow and room temperature.

- Drain pump is equipped as a standard accessory with 600 mm lift.

600 mm
- Two types of optional high-efficiency filter are available (65% and 95%, colourimetric method).

- A long-life filter (maintenance free up to one year*) is equipped as a standard accessory.

* 8 hr/day, 25 day/month. For dust concentration of 0.15 mg/m^3

- Major maintenance work can be performed by removing the panel. A flat-type suction grille and a detachable blade make cleaning easy.

Ceiling Mounted Cassette Corner Type

FXKQ25MA/FXKQ32MA
FXKQ40MA/FXKQ63MA

Slim design for flexible installation

- Slim body needs only 220 mm space above the ceiling. If you use a panel spacer (option), the unit can be installed in the minimum space of 195 mm.

  Min.195 mm
  Panel spacer
  20 mm
- Single-flow type allows effective air discharge from corner or from drop-ceiling.

- Drain pump is equipped as a standard accessory with 500 mm lift.

  500 mm

- Providing 3 different settings of standard, draft prevention and ceiling soiling prevention, the auto swing mechanism achieves even distribution of airflow and room temperature.

  (m)
  28℃ 26℃ 24℃
  32℃ 30℃ 22℃
  20℃
- Front discharge is possible with an air discharge unit (option), which allows the installation in the drop-ceiling or sagging wall.

  Main body
  Downward discharge
  Air discharge grille (Option)
  ＊Set for front discharge using a suspended ceiling.

  Main body
  Air discharge grille (Option)
  ＊Downward discharge is shut off and air is blown straight out (front discharge).

- A long-life filter (maintenance free up to one year*) is equipped as a standard accessory.

  * 8 hr/day, 25 day/month. For dust concentration of 0.15 mg/m^3

Slim Ceiling Mounted Duct Type
Slim design, quietness and static pressure switching

Suited for use in drop-ceilings!

FXDQ20PB/FXDQ25PB/FXDQ32PB

- Only 700 mm in width and 23 kg in weight, this model is suitable to install in limited spaces like drop-ceilings in hotels.

Great for hotel use!

Only 700 mm   **200 mm**

- Control of the airflow rate has been improved from 2-step to 3-step control.

- Low operation sound level

(dB(A))

FXDQ-PB/NB	20/25/32	40	50	63
Sound level (HH/H/L)	33/31/29	34/32/30	35/33/31	36/34/32

＊The values of operation sound level represent those for rear-suction operation.
  Sound level values for bottom-suction operation can be obtained by adding 5 dB(A).
＊Values are based on the following conditions:
  FXDQ-PB: external static pressure of 10 Pa; FXDQ-NB: external static pressure of 15 Pa.

FXDQ40NB/FXDQ50NB/FXDQ63NB

- Only 200 mm in height, this model can be installed in rooms with as little as 240 mm depth between the drop-ceiling and ceiling slab.

900 mm   **200 mm**
＊1,100 mm in width for the FXDQ63NB model.

Suspension bolt＊   Air filter

AIR

240 mm

Discharge grille＊

AIR   Suction grille＊

＊ To be obtained locally

- External static pressure selectable by remote controller switching make this indoor unit a very comfortable and flexible model.

  10 Pa-30 Pa/factory set: 10 Pa for FXDQ-PB models.
  15 Pa-44 Pa/factory set: 15 Pa for FXDQ-NB models.

- Drain pump is equipped as a standard accessory with 750 mm lift.

750 mm

FXSYQ20M/FXSYQ25M/FXSYQ32M
FXSYQ40M/FXSYQ50M/FXSYQ63M
FXSYQ80M/FXSYQ100M/FXSYQ125M
Highly flexible for various application

● Highly flexible installation is possible with a complete lineup of optional kits to satisfy various needs, such as the design concept, interior decoration and so on.

● The unit can be installed, if there is a space of 350 mm above ceiling. (when suction panel is used.)

Min. 350 mm
● Drain pump is equipped as a standard accessory with 250 mm lift.

250 mm
● High external static pressure allows the use of flexible ducts of various length.

● Low operation sound level (230 V)(dB(A))

FXSYQ-M	20/25/32	40	50	63	80/100	125
Sound level (H/L)	41/33.5	41/34.5	43/37	45/38.5	48/43	49/41.5

✳The values of operation sound level are based on Australian Standard 1217.6-1985. Measurement is based on bottom-return air entry.

Ceiling Concealed (Duct) Type

FXDYQ80MA/FXDYQ100MA
FXDYQ125MA/FXDYQ145MA
High static pressure offers flexible duct design that blends in with interior décor in stores and offices

- Hi-X heat exchanger coils provide even more energy efficiency.

- High external static pressure of 120 Pa allows comprehensive duct layout for various applications.

- Design of indoor units allows installation in limited roof spaces.

- Return air spigots included for ease of installation.

- Two external static pressure settings for added flexibility.

- Quiet yet powerful supply air fan.

- High strength galvanised steel casing.

Ceiling Mounted Duct Type

FXMQ20P/FXMQ25P/FXMQ32P
FXMQ40P/FXMQ50P/FXMQ63P
FXMQ80P/FXMQ100P/FXMQ125P
FXMQ140P
Middle and high static pressure allows for flexible duct design

- A DC fan motor increases the external static pressure capacity range to include middle to high static pressures, increasing design flexibility.

  30 Pa–100 Pa for FXMQ20P-32P
  30 Pa–160 Pa for FXMQ40P
  50 Pa–200 Pa for FXMQ50P-125P
  50 Pa–140 Pa for FXMQ140P

- All models are only 300 mm in height, an improvement over the 390 mm height of conventional models. The weight of the FXMQ40P has been reduced from 44 kg to 28 kg.

  300 mm
  Easy installation in buildings with narrow ceiling spaces

- Drain pump is equipped as a standard accessory with 700 mm lift.
  700 mm
  Ceiling

- Control of the airflow rate has been improved from 2-step to 3-step control.

- Low operation sound level (dB(A))

FXMQ-P	20/25	32	40	50	63	80/100	125	140
Sound level (HH/H/L)	33/31/29	34/32/30	39/37/35	41/39/37	42/40/38	43/41/39	44/42/40	46/45/43

- Energy-efficient
  - The adopted DC fan motor is much more efficient than the conventional AC motor, yielding an approximate 20% decrease in energy consumption (FXMQ125P).
- Improved ease of installation
  - Airflow rate can be controlled using a remote controller during test operation. With the conventional model, the airflow rate was controlled from the PC board. It is automatically adjusted to the range between approximately ±10% of the rated HH tap airflow for FXMQ20P-125P.

- Improved ease of maintenance
  - The drain pan can be detached for easy cleaning. An antibacterial treatment that uses silver ions has been applied to the drain pan, preventing the growth of slime, mould and bacteria that cause blockages and odours.

Ceiling Suspended Type

FXHQ32MA/FXHQ63MA
FXHQ100MA
Slim body with quiet and wide airflow

● Adoption of QUIET STREAM FAN

Uses the quiet stream fan and many advanced technologies.

Sound absorption material

Turbulent flow is produced

Straightening vane

Quiet stream fan
● Low operation sound level

(dB(A))

FXHQ-MA	32	63	100
Sound level (H/L)	36/31	39/34	45/37

● Installation is easy

● Drain pump kit (option) can be easily incorporated.

600 mm

Drain pump kit
(Built inside main unit)
● Wide air discharge openings produce a spreading 100° airflow.

100°
● Maintenance is easy

● Non-dew Flap with no implanted bristles

Bristle-free Flap minimises contamination and makes cleaning simpler.

Non-dew Flap
● Easy-to-clean flat design

● Maintenance is easier because servicing can be performed from below the unit.

● A long-life filter (maintenance free up to one year*) is equipped as a standard accessory.

* 8 hr/day, 25 day/month. For dust concentration of 0.15 mg/m^3

Wall Mounted Type

New	**FXAQ20P/FXAQ25P** **FXAQ32P/FXAQ40P** **FXAQ50P/FXAQ63P**

Stylish flat panel design harmonised with your interior décor

- Stylish flat panel design creates a graceful harmony that enhances any interior space.

- Flat panel can be cleaned with only the single pass of a cloth across their smooth surface. Flat panel can also be easily removed and washed for more thorough cleaning.

- Low operation sound level

(dB(A))

FXAQ-P	20	25	32	40	50	63
Sound level (H/L)	35/31	36/31	38/31	39/34	42/37	47/41

- Drain pan and air filter can be kept clean by mould-proof polystyrene.

- Vertical auto-swing realises efficiency of air distribution. The louvre closes automatically when the unit stops.

- 5 steps of discharge angle can be set by remote controller.

- Discharge angle is automatically set at the same angle as the previous operation when restarting. (Initial setting: 10˚ for cooling and 70˚ for heating)

- Flexible installation
  - Drain pipe can be fitted to from either left or right sides.

- Drain pump kit is available as optional accessory, which lifts the drain 1,000 mm from the bottom of the unit.

Height of drain-up

1,000 mm

Drain pump kit   Indoor unit
Floor Standing Type

FXLQ20MA/FXLQ25MA
FXLQ32MA/FXLQ40MA
FXLQ50MA/FXLQ63MA

Suitable for perimeter zone air conditioning

- Floor Standing types can be hung on the wall for easier floor cleaning. Running the piping from the back allows the unit to be hung on walls. Cleaning under the unit, where dust tends to accumulate, is considerably easier.

- The adoption of a fibre-less discharge grille featuring an original design to prevent condensation also helps prevent staining and makes cleaning easier.

- A long-life filter (maintenance free up to one year*) is equipped as a standard accessory.

  * 8 hr/day, 25 day/month. For dust concentration of 0.15 mg/m^3

Wall hanging   Floor installation
Concealed Floor Standing Type

FXNQ20MA/FXNQ25MA
FXNQ32MA/FXNQ40MA
FXNQ50MA/FXNQ63MA

Designed to be concealed in the perimeter skirting-wall

- The unit is concealed in skirting-wall of perimeter, that enables to create high class interior design.

- The connecting port faces downward, greatly facilitating on-site piping work.

- A long-life filter (maintenance free up to one year*) is equipped as a standard accessory.

  * 8 hr/day, 25 day/month. For dust concentration of 0.15 mg/m^3

Connecting port

Refrigerant piping
✳ Applies also to Floor Standing type (FXLQ-MA).

Ceiling Suspended Cassette Type

> FXUQ71MA
> FXUQ100MA
> FXUQ125MA

This thin indoor unit achieves optimum air distribution, and can be installed without the need for ceiling cavity

- Depending on installation site requirements or room conditions, 2-way, 3-way and 4-way discharge patterns are available.

- **4-way airflow from the centre of the store.**
- **The 3-way airflow can distribute comfortable air throughout the room.**
- **Only one unit is needed to distribute comfortable air throughout an L-shaped store.**
Connection unit   Connection unit is the device for connecting above indoor unit to VRVIII-S.

*1
Model	Maximum piping length between the BEV unit and the indoor unit.
FXUQ-MA	5 m

Notes:
- When connecting centralised-control device, it is necessary to install an interface adaptor for an indoor unit (DTA102A52).
- Connection unit BEVQ-MA is necessary for each indoor unit.
- The refrigerant piping height difference between the indoor units and the BEV unit must be within 4 m.
- The BEV unit must be installed within a maximum height difference between indoor units of 15 m.
- Branching of the refrigerant piping is not possible downstream of the BEV unit.

Note: Specifications are based on the following conditions;
• Cooling: (*1) Indoor temp.: 27°CDB, 19.5°CWB, Outdoor temp.: 35°CDB, Equivalent piping length: 7.5 m, Level difference: 0 m.
  (*2) Indoor temp.: 27°CDB, 19°CWB, Outdoor temp.: 35°CDB, Equivalent piping length: 7.5 m, Level difference: 0 m.
• Heating: Indoor temp.: 20°CDB, Outdoor temp.: 7°CDB, 6°CWB, Equivalent piping length: 7.5 m, Level difference: 0 m.
• Capacity of indoor unit is only for reference. Actual capacity of indoor unit is based on the total capacity index. (See Engineering Data Book for details.)
• Sound level: **(FXCQ-M)** Anechoic chamber conversion value, measured at a point 1.5 m downward from the unit centre.
  (FXKQ-MA) Anechoic chamber conversion value, measured at a point 1 m in front of the unit and 1 m downward.
  During actual operation, these values are normally somewhat higher as a result of ambient conditions.

Note: Specifications are based on the following conditions;
• Cooling: (*1) Indoor temp.: 27°CDB, 19.5°CWB, Outdoor temp.: 35°CDB, Equivalent piping length: 7.5 m, Level difference: 0 m.
  (*2) Indoor temp.: 27°CDB, 19°CWB, Outdoor temp.: 35°CDB, Equivalent piping length: 7.5 m, Level difference: 0 m.
• Heating: Indoor temp.: 20°CDB, Outdoor temp.: 7°CDB, 6°CWB, Equivalent piping length: 7.5 m, Level difference: 0 m.
• Capacity of indoor unit is only for reference. Actual capacity of indoor unit is based on the total capacity index.
 (See Engineering Data Book for details.)
• Sound level: Anechoic chamber conversion value, measured at a point 1.5 m downward from the unit centre.
    During actual operation, these values are normally somewhat higher as a result of ambient conditions.
★1: External static pressure is changeable to set by the remote controller. This pressure means "High static pressure - Standard".(Factory setting is 10 Pa for FXDQ-PB models and 15 Pa for FXDQ-NB models.)
★2: The values of operation sound level represent those for rear-suction operation. Sound level values for bottom-suction operation can be obtained by adding 5 dB(A).
★3: Values are based on the following conditions: FXDQ-PB: external static pressure of 10 Pa; FXDQ-NB: external static pressure of 15 Pa.

Note: Specifications are based on the following conditions;
• Cooling: (*1) Indoor temp.: 27°CDB, 19.5°CWB, Outdoor temp.: 35°CDB, Equivalent piping length: 7.5 m, Level difference: 0 m.
 (*2) Indoor temp.: 27°CDB, 19°CWB, Outdoor temp.: 35°CDB, Equivalent piping length: 7.5 m, Level difference: 0 m.
• Heating: Indoor temp.: 20°CDB, Outdoor temp.: 7°CDB, 6°CWB, Equivalent piping length: 7.5 m, Level difference: 0 m.
• Capacity of indoor unit is only for reference. Actual capacity of indoor unit is based on the total capacity index. (See Engineering Data Book for details.)
• Sound level: **(FXSYQ)** Anechoic chamber conversion value, based on Australian Standard 1217.6-1985. Measurement is based on bottom-return air entry.
 (FXDYQ) Anechoic chamber conversion value, measured at a point 1.5 m downward from the unit centre.
 During actual operation, these values are normally somewhat higher as a result of ambient conditions.
• For FXDYQ models, an air filter is not a standard accessory. A suitable locally obtained filter must be installed in the return air duct.
★1: External static pressure is changeable to change over the connectors inside electrical box, this pressure means
 "High static pressure-Standard-Low static pressure".
★2: External static pressure is changeable to change over the connectors inside electrical box, this pressure means "High static pressure-Standard".
★3: External static pressure is changeable to change over the connectors inside electrical box (High static pressure-Standard static pressure).
 The data above is for high static pressure setting.

Note: Specifications are based on the following conditions;
- Cooling: (*1) Indoor temp.: 27°CDB, 19.5°CWB, Outdoor temp.: 35°CDB, Equivalent piping length: 7.5 m, Level difference: 0 m.
    (*2) Indoor temp.: 27°CDB, 19°CWB, Outdoor temp.: 35°CDB, Equivalent piping length: 7.5 m, Level difference: 0 m.
- Heating: Indoor temp.: 20°CDB, Outdoor temp.: 7°CDB, 6°CWB, Equivalent piping length: 7.5 m, Level difference: 0 m.
- Capacity of indoor unit is only for reference. Actual capacity of indoor unit is based on the total capacity index.
  (See Engineering Data Book for details.)
- Sound level: Anechoic chamber conversion value, measured at a point 1.5 m downward from the unit centre.
    During actual operation, these values are normally somewhat higher as a result of ambient conditions.
- *1: External static pressure can be modified using a remote controller that offers seven (FXMQ20-32P), thirteen (FXMQ40P), fourteen (FXMQ50-125P) or ten (FXMQ140P) levels of control. These values indicate the lowest and highest possible static pressures. The standard static pressure is 50 Pa for FXMQ20-32P and 100 Pa for FXMQ40-140P.

― Connection unit series indoor units ―

* A type of BEV unit is necessary for each Connection unit series indoor unit. Refer to the Engineering Data Book for details.
* If indoor units from the Connection unit series are connected within a single refrigerant system to indoor units from any other series, cooling/heating switchover will not be possible using the remote controller of the Connection unit series indoor units. However, if the remote controller of an indoor unit from the other series is set as a master remote controller, cooling/heating switchover will be possible.
* If all indoor units are from the Connection unit series, an outdoor unit Cool/Heat selector will be needed to enable cooling/heating switchover.
* Group control between Connection Unit series equipment within one system is possible. However, group control with the other VRV indoor units is not possible.

Ceiling Suspended Cassette Type

MODEL	Indoor unit		FXUQ71MAV1	FXUQ100MAV1	FXUQ125MAV1

●CONTROL SYSTEMS ●

System Configuration

No.	Item			Model No.	Function
1	Residential central remote controller			Note 3 DCS303A51	•Up to 16 groups of indoor units (128 units) can be easily controlled using the large LCD panel. ON/OFF, temperature settings and scheduling can be controlled individually for indoor units.
2	Central remote controller			Note 2 DCS302CA61	•Up to 64 groups of indoor units(128 units) can be connected, and ON/OFF, temperature setting and monitoring can be accomplished individually or simultaneously. Connectable up to 2 controllers in one system.
2-1	Electrical box with earth terminal (3 blocks)			KJB311AA	
3	Unified ON/OFF controller			Note 2 DCS301BA61	•Up to 16 groups of indoor units(128 units) can be turned, ON/OFF individually or simultaneously, and operation and malfunction can be displayed. Can be used in combination with up to 8 controllers.
3-1	Electrical box with earth terminal (2 blocks)			KJB212AA	
3-2	Noise filter (for electromagnetic interface use only)			KEK26-1A	
4	Schedule timer			Note 2 DST301BA61	•Programmed time weekly schedule can be controlled by unified control for up to 64 groups of indoor units (128 units). Can turn units ON/OFF twice per day.
5	Interface adaptor for SkyAir series	For SkyAir, FD(Y)M-FA, FDY-KA, FDYB-KA, FVY(P)J-A, FXUQ-MA		★ DTA102A52	•Adaptors required to connect products other than those of the VRV System to the high-speed DIII-NET communication system adopted for the VRV System. * To use any of the above optional controllers, an appropriate adaptor must be installed on the product unit to be controlled.
		For SkyAir FFQ-B, FHQ-BV, FAQ100BV, FBQ-B		★DTA112BA51	
6	Central control adaptor kit	For UAT(Y)-K(A),FD-K		★ DTA107A55	
7	Wiring adaptor for other air-conditioner			★ DTA103A51	
8	DⅢ-NET Expander Adaptor			DTA109A51	•Up to 1024 units can be centrally controlled in 64 different groups. •Wiring restrictions (max. length: 1,000 m, total wiring length: 2,000 m, max. number of branches: 16) apply to each adaptor.
8-1	Mounting plate			KRP4A92	•Fixing plate for DTA109A51

Notes: 1. Installation box for ★adaptor must be obtained locally.
2. For FXUQ-MAV1, an interface adaptor (DTA102A52) for the SkyAir series is necessary.
3. For residential use only. Cannot be used with other centralised control equipment.

Building Management System

No.	Item				Model No.	Function
1	intelligent Touch Controller	Basic	Hardware	intelligent Touch Controller	DCS601C51	•Air-Conditioning management system that can be controlled by a compact all-in-one unit.
1-1		Option	Hardware	DIII-NET plus adaptor	DCS601A52	•Additional 64 groups (10 outdoor units) is possible.
1-2	Electrical box with earth terminal (4 blocks)				KJB411A	•Wall embedded switch box.
2	intelligent Touch Manager	Basic	Hardware	intelligent Touch Manager	DCM601A51	•Air-conditioning management system that can be controlled by touch screen.
2-1		Option	Hardware	iTM plus adaptor	DCM601A52	•Additional 64 groups (10 outdoor units) is possible. Max. 7 iTM plus adaptors can be connected to intelligent Touch Manager.
2-2				iTM integrator	DCM601A53	•Max. 5 intelligent Touch Managers can be integrated.
2-3			Software	iTM power proportional distribution	DCM002A51	•Power consumption of indoor units are calculated based on operation status of the indoor unit and outdoor unit power consumption measured by kWh metre.
2-4				iTM energy navigator	DCM008A51	•Building energy consumption is visualised. Wasted air-conditioning energy can be found out.
2-5	Di unit				DEC101A51	•8 pairs based on a pair of On/Off input and abnormality input.
2-6	Dio unit				DEC102A51	•4 pairs based on a pair of On/Off input and abnormality input.
3	Communication line	*1 Interface for use in BACnet®			DMS502B51	•Interface unit to allow communications between VRV and BMS. Operation and monitoring of air-conditioning systems through BACnet® communication.
3-1		Optional DIII board			DAM411B51	•Expansion kit, installed on DMS502B51, to provide 2 more DIII-NET communication ports. Not usable independently.
3-2		Optional Di board			DAM412B51	•Expansion kit, installed on DMS502B51, to provide 16 more wattmeter pulse input points. Not usable independently.
4		*2 Interface for use in LONWORKS®			DMS504B51	•Interface unit to allow communications between VRV and BMS. Operation and monitoring of air-conditioning systems through LONWORKS® communication.
5	Contact/analogue signal	Unification adaptor for computerised control			★ DCS302A52	•Interface between the central monitoring board and central control units.

Notes: *1. BACnet® is a registered trademark of American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE).
*2. LONWORKS® is a trademark of Echelon Corporation registered in the United States and other countries.
*3. Installation box for ★adaptor must be obtained locally.

Warning

⚠️

- Daikin products are manufactured for export to numerous countries throughout the world. Prior to purchase, please confirm with your local authorised importer, distributor and/or retailer whether this product conforms to the applicable standards, and is suitable for use, in the region where the product will be used. This statement does not purport to exclude, restrict or modify the application of any local legislation.

- Ask a qualified installer or contractor to install this product. Do not try to install the product yourself. Improper installation can result in water or refrigerant leakage, electrical shock, fire or explosion and may have resultant impacts on warranty.

- Use only those parts and accessories supplied or specified by Daikin. Ask a qualified installer or contractor to install those parts and accessories. Use of unauthorised parts and accessories or improper installation of parts and accessories can result in water or refrigerant leakage, electrical shock, fire or explosion.

- Read the User's Manual carefully before using this product. The User's Manual provides important safety instructions and warnings. Be sure to follow these instructions and warnings.

If you have any enquiries, please contact your local importer, distributor and/or retailer.

Cautions on product corrosion

1. Air conditioners should not be installed in areas where corrosive gases, such as acid gas or alkaline gas, are produced.
2. If the outdoor unit is to be installed close to the sea shore, direct exposure to the sea breeze should be avoided. If you need to install the outdoor unit close to the sea shore, contact your local distributor.

Organization:
DAIKIN INDUSTRIES, LTD.
AIR CONDITIONING MANUFACTURING DIVISION

Scope of Registration:
THE DESIGN/DEVELOPMENT AND MANUFACTURE OF COMMERCIAL AIR CONDITIONING, HEATING, COOLING, REFRIGERATING EQUIPMENT, HEATING EQUIPMENT, RESIDENTIAL AIR CONDITIONING EQUIPMENT, HEAT RECLAIM VENTILATION, AIR CLEANING EQUIPMENT, COMPRESSORS AND VALVES.

JMI-0107

Organization:
DAIKIN INDUSTRIES (THAILAND) LTD.

Scope of Registration:
THE DESIGN/DEVELOPMENT AND MANUFACTURE OF AIR CONDITIONERS AND THE COMPONENTS INCLUDING COMPRESSORS USED FOR THEM
