YEAR
WARRANTY*

-  The most economical way to cool your whole home
-  Save on your energy bills
-  Hushdrive motor for whisper quiet operation
-  Envirowing™ Fan maximises airflow to cool your home faster

*Conditions apply.

Why choose evaporative air conditioning?

The best way for your family to enjoy summer is to cool your whole home on those hot summer days. With energy bills rising on a daily basis, the most economical way to do that is with fresh naturally cooled air using a Celair evaporative air conditioner.

Evaporative air conditioning facts:

- ✦ Costs just a few cents an hour to run (up to 87% cheaper to run than a comparable ducted refrigerated system)*
- ✦ Cost-effective to install
- ✦ Keeps your whole home filled with fresh cool air
- ✦ Relies on a totally natural process of evaporation
- ✦ Operates with doors and windows open
- ✦ Is a better choice for allergy sufferers as the saturated filter pads help reduce dust, pollen and pollutants
- ✦ Low noise, giving you the benefit of peaceful summer nights

Why Celair?

The Celair Profile offers you quality, reliability and durability. For over 30 years Celair has been keeping Australians cool, with smart, innovative cooling solutions, and nothing's changed. With access to some of the most advanced technology in the business, we continue to strive for smarter, environmentally friendly cooling solutions that maximise energy efficiency.

The Celair Profile features a stylish louvre design and a high tech structure for long life. The design also features a sloping base which ensures the unit sits neatly on your roof. Inside the Celair Profile features a computerised control module, four large filters for maximum air flow, a reliable multi-flow water pump, Hushdrive motor for quiet operation and the extremely efficient Envirowing™ Fan.

The Celair Profile offers:

- ✦ Optimal efficiency and durability, at a value-for-money price
- ✦ Simple to operate
- ✦ Envirowing™ Fan maximises efficiency and quietness
- ✦ One of the most contemporary looking units on the market
- ✦ A range of colourfast, fade-resistant popular roof-matched colours (including Terracotta Red, Charcoal, Beige and Green*)
- ✦ A revolutionary UV-resistant, injection-moulded cabinet, built and tested to survive many years of extreme temperatures

*Made to order.

CHEAPER TO INSTALL AND FAR CHEAPER TO RUN

Installation costs

Hourly running cost*

*SEAV, 'Operating costs of electrical appliances' November 2002.

What keeps Celair ahead of the rest?

Aside from its super strong, UV-resistant injection-moulded cabinet, contemporary design features, and extremely low running costs, the Celair Profile boasts some of the most innovative cooling features in the market, and all at an unbeatable price.

Hushdrive motor technology

The patented quiet winding motor design means you can barely hear the unit when it's running.

Envirowing™ Fan

The Envirowing™ Fan is a one piece injection-moulded fan, designed for maximum efficiency and optimum performance. The result is more cool air delivered into your home. It is also extremely quiet.

Simple, effective water management

Celair uses a simple but effective water management device to allow the evaporative air conditioner to bleed a small amount of water from the unit, ensuring fresh water replenishes the holding tank that allows your Celair unit to operate in an efficient manner. This simple device will allow for differing water qualities and is initially set by your installer on commissioning.

Greater efficiency

Advanced engineering design puts the Celair Profile at the forefront of cooling efficiency. Its unique fan and motor construction draws air evenly over all four CELdek® pads to deliver enhanced reliability, low maintenance and measurable savings in running costs.

CELdek® "Easyflow" filter

CELdek®, "Easyflow" technology allows even water distribution leading to greater efficiency.

A choice of optional extras:

Celair Aquamiser™ water conservation system

Designed to automatically minimise the water usage of your evaporative air conditioner, this clever and reliable device ensures that the system has the correct amount of fresh water to guarantee efficient operation.

Choice of controllers

Celair Premium Wall-Mounted Controller

- ✦ Climate Control thermostat which can be preset to select desired comfort levels throughout the day and night
- ✦ A timer function that enables you to automatically switch your cooler on or off in 2, 4 or 8 hour increments. This is ideal for when you go to bed
- ✦ An enhanced water management option where an optional drain valve is fitted. This allows for cycled drain times, as well as cleaning and emptying the water reservoir when not operational, reducing seasonal maintenance

Celair Pyrox Slimline Digital Controller

- ✦ Easy to operate and simple timer operation (up to 24 hr delay)
- ✦ Small, compact and slimline
- ✦ Clear and easy-to-read LCD display
- ✦ Compatible with Bonaire 3 star Ducted Gas Heating

Weather seal

During winter, when the unit is not in use the Celair weather seal helps to keep warm air in and cold draughts out.

Celair warranty – peace of mind

Celair evaporative air conditioning units are built to last – we guarantee it.[#] That's why we can offer you the security of one of the most comprehensive warranties on the market for all of our Celair units. Celair is designed and made for Australian conditions by Climate Technologies, an Australian-owned and operated company.

Extended warranty*

For added peace of mind Celair offers a 2 year extended domestic warranty* on all Celair Profile coolers.

Note: Domestic warranty only. Unit warranty for commercial applications is one year parts and labour.
*Subject to a maintenance service call in the third year, extended warranty excludes CELdek® pads.
*Guarantee limited to the Celair unit only, excludes ducting and installation costs.

CELRES sizing system

Your authorised Celair dealer uses our unique CELRES computer sizing system to calculate exactly which Celair Ducted Evaporative Air Conditioning Unit is best suited to your home, family and local environment. The program achieves this by selecting your state and weather data region, then calculating the area of your home to determine the unit capacity and duct size needed to ensure your family will stay cool, even on the hottest days. The program can also calculate the approximate operating costs, so you will know up front just how cheap Evaporative Air Conditioning is to run. Ask your Celair Authorised dealer for more information.
